
Fiber Laser Cutting Machine with Auto Exchange Table

1. DA-3015H is a heavy-duty bed design with exchange table fiber laser cutting machine for high-power lasers for the actual needs of sheet metal processing industry. The bed is made of thick rectangular tube welding, tempering process, which can meet the requirements of thick plate cutting strength and can withstand the impact of high speed operation.

2. The machine is equipped with an exchanged double working platform. While working on one table, the other platform can load and unload the sheet workpiece. Exchange platform can save more than 50% of space and cost, and achieve higher cutting precision and efficiency.

3. The machine is equipped with high-power Yaskawa servo motor, imported guideway transmission system, professional control system and stable cutting system. It is easy for users to operate and maintain. the strict assembly process ensures the stable operation of the machine with high precision.

Parameters

Model	DA-3015H /4015H /4020H with Auto table exch
working Area	1500*3000MM / 1500*4000MM / 4000*2000
Laser Type	Fiber Laser
Laser Source	Raycus / MAX/ IPG
Laser Power	1kw/1.5kw/2kw/3kw/4kw/6kw
Wavelenth	1070 nm
Water chiller	S&A / Hanli
Transmission	T-WIN guide rail, T-WIN rack
X Y Z Motors	Japan Yaskawa servo motor
Maximum velocity of movement	80m/min
X/Y axis positioning accuracy	±0.05mm
Supported Format and Software	CAD, CorelDRAW, plt.,AI.,dxf.
Lubrication	Centralization Lubrication
Cutting Thickness	0.5-30 mm
Controller system	Cypcut
Cutting head	Raytools
Machine power	30KW
Working Voltage	380V, 50Hz/60Hz
