
Fabric Auto Feeding Laser Cutting Machine DA1610F

Features

DA 1610F laser machine with auto feeding system is widely used in garment industry. The work efficiency is highly improved. Optional can with CCD camera system.

Applicable Industry

clothing, shoe industry, footwear, home textiles, cloth embroidery, toy, special-shaped trademarks, airbags, leather, luggage, camp, sports, automotive interiors.

Applicable Materials

genuine leather, artificial leather, soft leather, decorative leather, packaging leather, etc, all kinds of leather materials, pure cotton, real silk, chemical fiber, denim, non-woven materials.

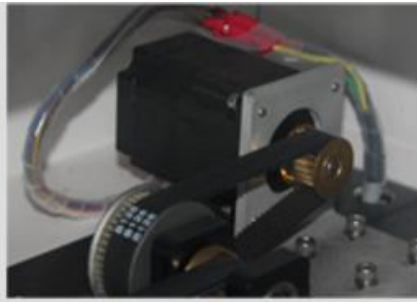

Parameters

Model	DA1610F Auto Feeding
Working Area	1600*1000mm
Laser Power	80W/100W/130W
Laser type	sealed CO2 laser tube
Cooling method	water cooling, industrial chiller
Working platform	blade platform
Drive motor	stepper & drivers
Working speed	≤ 600mm/s
Position accuracy	±0.05mm
Drawing format	BMP、 PLT、 DST、 AI、 DXF etc
Supply Voltage	AC220±10% , 50~60Hz
Working temperature	5~40℃
Working humidity	5%~95% no condensation

Accessories

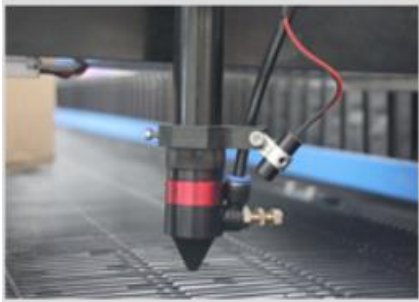

Auto Feeding

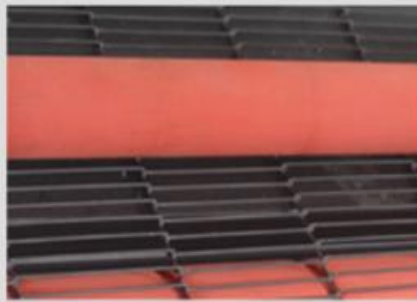

Drive Motor

Easy Operation Control Panel

Laser Head

B Type Mesh Belt

Laser Tube
